

Now Available Direct Through Your Local Distributor!

-INCH-TO-GALLON SCALES- For Petro-Meter 1329 Series Tank Gauges

Use this Form to Order a Custom Inch/Gallon Scale (P/N: 1329-I/G)

Distributor: _____ Contact Name: _____ P.O. _____

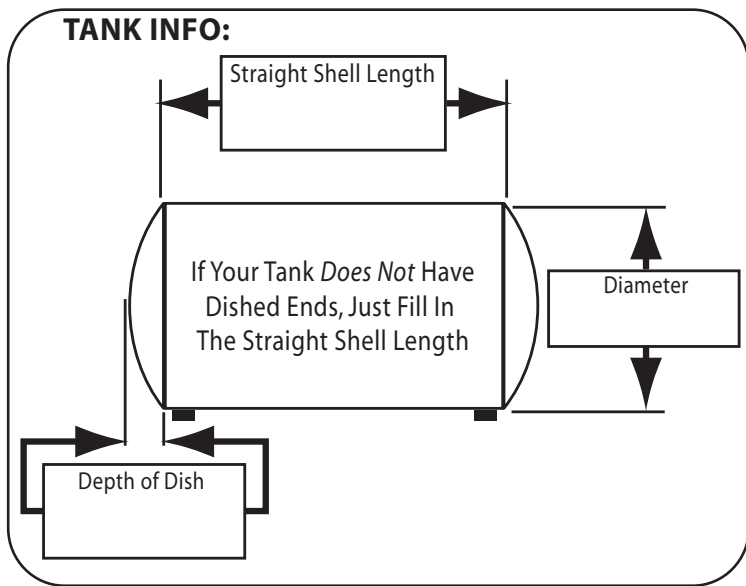

Phone: _____ Fax: _____

Please fill in the tank's INSIDE DIMENSIONS (Feet and/or Inches) on drawing below. Our Engineers will calculate the resulting Gallon increments per inch of tank height.

If you know ONLY the Gallons and Height of your tank, we can approximate the corresponding tank length to produce an accurate scale

Dished Heads: Note that the term "straight shell" refers only to the cylindrical section of a tank. If dishes are present, their capacity will be calculated separately and added to the capacity of the "straight shell" portion.

Please call us if you have any questions or need assistance.

NOTES:

Which Petro-Meter Gauge* is this scale for?

Circle One: 112 112A 114 114A 225 225A 227 227A 339 339A

*Petro-Meter Gauges with The "A" Designation are Recommended for Use in Unheated Indoor Installations and Contain Non-Freezing Indicating Liquid.

Type of Liquid in Tank -or- Specific Gravity (ie #2 Oil, etc.) _____

Manufacturer (if known) _____ Nominal Capacity _____

This Information is Certified to be Correct
